

All Otto Hutt writing instruments are made entirely in Germany and combine meticulous craftsmanship with fine details.

Materials used include 925 sterling silver with rhodium, platinum, palladium, ruthenium plating.

Otto Hutt established this factory in 1920 in Pforzheim, Germany, the city that produces 80% of jewelry exported from Germany. Every pen is produced with the precision of jewelry.

All Otto Hutt writing instruments feature a 6 digit serial number; a unique identity to every pen.

YOUR handwriting says a lot about you - and so does the pen you hold. That's why over a century's experience as pen pioneers has led Platignum to create this distinctive range of quality pens. From the self-filling ranges manufactured in 1919, Platignum invented the world's first replacement nib, created the retractable ball-point in 1950 and introduced the first cartridge system. Platignum, the UK pen pioneers have been writing the history of the pen for generations and are continuing to innovate for the future.
