# Tag

USB 3.0

16 GB

USB 3.0 is 10 times faster with transfer rates of 4.8Gbps compared to USB 2.0

USB 3.0 is backward compatible with older version of USB on your computer. A USB 3.0 memory stick will work on any computer while USB 2.0 might not be available anymore on the most recent computer models.

USB 3.0 is bi-directional in transferring data meaning it has a specific line for writing and one for reading data at the same time.

## ITXD 606 - TAG 3.0
